## Summer Training

### MERN Stack Development | Cipher School | Link

July 2025

- Learned MongoDB, Express.js, React.js, and Node.js to build a full-stack web application.
- Developed sample projects integrating frontend and backend.

### Master's in Data Structures and Algorithms – Theory to Practice | LPU | Link

July 2024

- Intensive training on arrays, linked lists, stacks, queues, trees, graphs, sorting, searching, and DP.
- Hands-on problem-solving and optimization strategies.

## Projects

### AI Driven Public Health Chatbot for Disease Awareness | Link

2025

- Developed an AI-based chatbot to provide disease awareness and basic health guidance.
- Designed responsive UI and interactive features for better accessibility.
- Integrated AI logic to deliver accurate and user-friendly responses.
- **Tech:** HTML, CSS, and JavaScript, AI Concepts

### Image-based Animal Type Classification for cattle and buffaloes | Link

2025

- Trained a ResNet-18 CNN model using PyTorch for cattle vs buffalo image classification.
- Evaluated model convergence and generalization by monitoring training and validation loss over 15 epochs.
- Analyzed learning curves showing stable training behavior with minimal overfitting.
- **Tech:** Python, PyTorch, OpenCV, and CNN (ResNet-18)

## Research Publication

### Liver Cancer Detection Using Deep Learning (UNet, CapsNet, ViT & Hybrid Model) | Published

2025

- Co-author of a research paper proposing a hybrid deep-learning architecture for liver tumor detection using UNet, CapsNet, ViT, and a custom hybrid model.
- Improved segmentation performance by reducing false negatives and enhancing tumor boundary accuracy.
- Evaluated on a large CT-scan dataset with consistent training, validation, and preprocessing pipelines.

## Patent

### Mood-Sensing Smartphone Back Cover with Adaptive Visual Display | Provisional Patent Filed

2025

- Invented an AI-based mood-sensing smartphone back cover with adaptive OLED visual display.
- Designed the complete system architecture and concept framework for the emotion-responsive accessory.
- Conducted novelty and prior-art analysis to establish the invention's uniqueness for patent filing.

## Certificates

**Coursera** | Link – Google UX Design Professional Certificate

August 2025

**NPTEL** | Link - Cloud Computing

May 2025

**MongoDB** | Link – Introduction to MongoDB

June 2025

## Achievements

Achieved selection and presented research at the IEEE-indexed International Conference RCSM 2025, December 2025

**Code Chef:** Secured Gold Badge in Problem Solving

**GFG:** Secured Global Rank 8025 in GFG

## Skills

**Programming Languages:** C++, Java, JavaScript

**Technologies/Frameworks:** HTML, CSS, Bootstrap, Node JS, React JS, MySQL, MongoDB Atlas, Figma

**Skills:** Critical Thinking, Collaboration, Project Management, Adaptability

## Education
